## MINERALS LTD.

### MANAGEMENT'S DISCUSSION AND ANALYSIS FOR THE YEAR ENDED JUNE 30, 2017

---

REPORT DATE:  
**October 25, 2017**

This Management Discussion and Analysis (the "MDA") provides relevant information on the operations and financial condition of Velocity Minerals Ltd. (the "Company") for the year ended June 30, 2017. Subsequent to the year end, the Company closed a transformative transaction which included the acquisition of new gold exploration properties in Bulgaria and a change in management and board.

The Company is in the business of mineral exploration in Eastern Europe, currently focused in Bulgaria. Activities include the evaluation, acquisition and exploration of mineral exploration properties in search of economic mineral deposits. The realization of amounts shown for exploration and evaluation assets is dependent upon the discovery of economically recoverable reserves and future profitable production, or proceeds from the disposition of these assets. The carrying values of exploration and evaluation assets do not necessarily reflect their present or future values.

All monetary amounts in this MDA and in the consolidated financial statements are expressed in Canadian dollars, unless otherwise stated. Financial results are being reported in accordance with International Financial Reporting Standards ("IFRS").

The Company's certifying officers, based on their knowledge, having exercised reasonable diligence, are responsible to ensure that these filings do not contain any untrue statement of material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it was made, with respect to the period covered by these filings, and these consolidated financial statements together with other financial information included in these filings. The Board of Directors' approves the consolidated financial statements and MDA and ensures that management has discharged its financial responsibilities.

The MDA should be read in conjunction with the Company's consolidated financial statements and notes thereto for the year ended June 30, 2017.

The Company is registered in the province of British Columbia. Its principal office is located at Suite 2300 – 1177 West Hastings Street Vancouver, BC, V6E 2K3. Its registered and records office is located at Suite 415 – 1040 West Georgia Street, Vancouver, BC, V6E 4H1.

#### **DESCRIPTION OF BUSINESS**

Velocity Minerals Ltd. is a gold exploration and development company focused on Eastern Europe. The Company's management and board include mining industry professionals with experience spanning Europe, Asia and the Americas as employees of major mining companies as well as founders and senior executives of junior to mid-tier public companies. The teams' experience includes all aspects of mineral exploration, resource definition, feasibility, finance, mine construction and mine operation as well as a track record in managing publicly listed companies.

The Company is currently focused on exploration assets in Bulgaria, which is a member of the European Union (2007) with a mining law that was established in 1999 and updated in 2011. Mining royalties compare favourably with more established mining countries like Canada, Peru and Chile. Bulgaria also boasts an exceptionally low corporate tax rate of only 10% and the country's education system is excellent with good availability of experienced mining professionals in a favourable cost environment. Foreign mining companies are successfully operating in Bulgaria. Despite the positive operating environment, the number of established companies is low and Velocity is among the first movers in a new influx of foreign mining investment.

The Company's management and board believe that local knowledge and experience are essential components of mining investment in a foreign jurisdiction. Velocity Minerals has entered into two property option agreements with Gorubso Kardzhali A.D. ("Gorubso"), an established and respected mining company in Bulgaria. Gorubso operates the underground Chala Gold Mine (since 2006) and the Kardzhali Carbon In Leach (CIL) plant (since 2011), which produces gold dore. Gorubso is the first and only company in Bulgaria to have secured a permit for cyanide-related processing of gold ores. Velocity's management has a long-standing relationship with Gorubso as well as abundant previous experience in Bulgaria and elsewhere in the region.

## **BUSINESS HIGHLIGHTS AND SUBSEQUENT EVENTS**

### **Property Acquisitions**

On July 21, 2017, subsequent to the Company's June 30, 2017 year end, the Company closed its share purchase and sale agreement (the "Transaction") with 1077076 B.C. Ltd. ("7076") and the shareholders of 7076, such that the Company has acquired all the outstanding shares of 7076 in exchange for 18 million common shares of the Company, with the effect that 7076 is now a wholly owned subsidiary of the Company. The Company now holds (through 7076) options to acquire interests in the Tintyava property (including the Rozino Project) and the Ekuzya property located in southeastern Bulgaria. Terms of the property agreement are discussed in the Exploration Projects section of the MDA. The Company also paid a finder's fee of 600,000 common shares of the Company regarding the acquisition.

### **Change of Management and Board**

In conjunction with the closing of the Transaction, all of the directors of Velocity have resigned (with the exception of Joseph Martin), and have been replaced by Keith Henderson, Gord Doerksen, Mark Cruise and Daniel Marinov. In addition, each of the officers of Velocity has resigned and have been replaced with Keith Henderson as CEO and President, Stuart Mills as Vice President – Exploration, and Blaine Bailey as CFO. Career summaries for each of the new management and board members is outlined below.

Keith Henderson, CEO, President & Director -- Keith has 25 years' global experience in the mineral exploration industry throughout Africa, Europe, and North and South America. He was educated in Europe, graduating with B.Sc. (Hons) and M.Sc. in geology and has extensive experience in multiple mineral deposit types and commodities. Keith worked with Anglo American Exploration in Europe and North America, leading a number of exploration projects and ultimately, he was appointed project manager for Anglo Coal as the company made its first entry into Canada. In 2007, Keith joined Cardero Resource Corp. as Executive Vice-President, where he played a critical role in advancing the Pampa de Pongo through a positive scoping study and ultimate sale for US\$100 million cash. He was formerly President & CEO at Dorato Resources and is currently President & CEO at Centenera Mining focused on project acquisition and exploration in Argentina. Keith serves on the board of several public companies.

Stuart Mills, Vice President Exploration -- Stuart has an M.Sc. in Mineral Exploration & Mining Geology and 30 years' experience working in minerals exploration and advanced feasibility projects. He is a skilled and enthusiastic explorationist with a number of significant discoveries, including the Galat Sufar gold deposit in Sudan (maiden resource of 28.8Mt @ 2.2 g/t Au, 0.8 g/t cut-off; approximately 2 million ounces). Stuart's early career was with Anglo American, working initially as Senior Geologist in Bulgaria, Turkey, Yemen, Iran, and Ireland and he was ultimately appointed Principle Geologist Asia-Pacific, having responsibility for exploration in China, India and Australia. In Australia, Stuart was responsible for Anglo's Myrtle zinc discovery in the Batten Trough. Later, Stuart worked with Lundin Mining as Regional Exploration Manager Africa-Eurasia where he had exploration responsibility for Lundin's Ozernoe zinc – lead deposit in Siberia. He was also part of the Lundin M&A team and Lundin's exploration representative on the Tenke Fungurume ownership team. He was later

Exploration Manager with technical responsibilities on all of Red Back Mining's projects and was part of the M&A team that sold Red Back to Kinross for \$7.2 billion. Most recently, he was country manager for Orca Gold in Sudan and managed exploration funded by the \$65M RTO of Canaco Resources, discovering Galat Sufar. Stuart has global experience having actively explored and/or reviewed projects throughout most of the world.

Blaine Bailey, CFO -- Blaine is a Certified General Accountant who has worked with numerous private and public companies over the past 20 years. Blaine brings complementary skills to the team in the areas of finance, administration and financial reporting.

Mark Cruise, Director -- Mark's career in mineral exploration and mine development spans 25 years. He is currently President & CEO at Trevali Mining (TSX: TV) (\$1B market capitalization), a zinc-miner with operations in Peru, Canada, Namibia and Burkino Faso. Mark co-founded the company in 2007 and managed development projects in Peru and Canada through discovery, resource definition, mine design, finance, and mine construction. Most recently (2017), Trevali announced definitive agreements with Glencore PLC whereby Trevali would acquire a portfolio of zinc assets in Namibia and Burkino Faso for an aggregate purchase price of approximately US\$400 million. During his career, Mark has worked with Anglo American, Pasminco and junior TSX-listed companies. He was formerly part of Anglo's feasibility team for the Lisheen zinc-lead mine in Ireland before taking up the role of Exploration Manager North America for Anglo American. He was later VP Business Development for Cardero Resource Corp and was co-founder at International Tower Hill Mines which peaked at \$800M market capitalization (2010).

Daniel Marinov, Director -- Daniel has 25 years of international experience in the mining and mineral exploration industry including five years in an underground production environment. He holds a Master of Science degree in mineral exploration from the University of Mining and Geology of Sofia, Bulgaria. He has extensive experience in precious, base metal and industrial minerals exploration having worked throughout Eastern Europe, Asia, Australia, as well as Central and South America. Daniel, currently Vice President Exploration at Trevali Mining, is focused on rapidly expanding resources at Trevali's four operations and has a strong discovery track record. In his career, Daniel has undertaken senior geological and managerial roles with Anglo American and Rio Tinto. Prior to joining Trevali, Daniel was the project exploration manager at Anglo's Michiquillay porphyry copper-gold-molybdenum deposit in Peru.

Gordon Doerksen, Director -- Gord has more than 25 years of operational and mine engineering in Canada, USA and throughout Africa. He is currently Vice-President Technical Services at JDS Energy and Mining and he is a professional mining engineer. At JDS, Gord has technical oversight on engineering work and 43-101 reports from due diligence to scoping and feasibility. Gord's engineering experience includes mine planning, project engineering and senior management at mines throughout North America and Africa, working with Konkola Copper Mines (Anglo American), Sandvik, FMC Corporation and Giant Yellowknife Mines. Prior to joining JDS early in 2012, Gord worked at SRK Consulting (Canada) Inc. for six years where he was a Principal and lead project teams.

## **Financing**

On June 29, 2017 14,000,000 previously issued warrants were transferred by the holders to the shareholders of 7076 and all of the 14,000,000 warrants were exercised such that Velocity received exercise proceeds of \$1,050,000.

On July 21, 2017, the Company closed a concurrent private placement of 8,857,000 units at a price of \$0.25 per unit for total gross proceeds of \$2,214,250. Each unit consists of one common share and one-half of one common share purchase warrant, with each whole warrant exercisable for 12 months at 40 cents per share, provided that in the event the closing price of the Company's shares on the TSX-V is equal to or greater than 60 cents per share for 10 consecutive trading days at any time following four months after the date of closing, The Company may reduce the remaining exercise period of the warrants to not less than 30 days following the date of such notice. Aggregate finders' fees of \$94,448 and 377,790 finder warrants were paid by the Company. Each finder warrant entitles the holder to acquire one share of Velocity at 25 cents over 24 months.

On September 25, 2017, the Company closed an additional private placement of issuing a total of 3,803,176 units priced at \$0.34 per unit to raise gross proceeds of \$1,293,079.84. Each unit consisted of one common share of the Company and one-half of one warrant, with each whole warrant entitling the holder thereof to purchase one common share of the Company for \$0.50 for a period of 12 months from the closing of the financing. The Company also paid aggregate finder's fees of \$74,256 cash and 218,400 finder's warrants. The finder's fees consisted of a cash commission equal to 7% of the gross

proceeds raised by each finder and finder's warrants equal to 7% of the corresponding number of units issued. Each finder's warrant entitles the holder thereof to purchase one common share of Velocity for \$0.34 for a period of 12 months from the closing of the financing. The common shares and warrants comprising the units and the finder's warrants are subject to a hold period of four-months and one day in Canada.

### **Exploration**

Subsequent to the year end the Company completed approximately 3,500m of diamond drilling at the Rozino project. Details and highlights are included in the Exploration Projects section of this MDA.

### **FORWARD LOOKING AND CAUTIONARY STATEMENTS**

This MD&A contains forward-looking statements and forward-looking information (collectively, "forward-looking statements") within the meaning of applicable Canadian and U.S. securities legislation, including the United States Private Securities Litigation Reform Act of 1995 concerning the business, operations and financial performance and condition of the Company. All statements, other than statements of historical fact, included herein including, without limitation, statements regarding future capital expenditures and financings (including the amount and nature thereof), anticipated content, commencement, and cost of exploration programs in respect of the Company's projects and mineral properties, anticipated exploration program results from exploration activities, the discovery and delineation of mineral deposits, resources and/or reserves on the Company's projects and mineral properties, and the anticipated business plans and timing of future activities of the Company, are forward-looking statements. Although the Company believes that such statements are reasonable, it can give no assurance that such expectations will prove to be correct.

Often, but not always, forward looking information can be identified by words such as "pro forma", "plans", "expects", "may", "should", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates", "believes", "potential" or variations of such words including negative variations thereof, and phrases that refer to certain actions, events or results that may, could, would, might or will occur or be taken or achieved.

Forward looking information involves known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to differ materially from any future results, performance or achievements expressed or implied by the forward-looking information. Such risks and other factors include, among others;

- the Company's strategies and objectives, both generally and in respect of its specific mineral properties or exploration and evaluation assets
- the ability of the Company to obtain sufficient financing to fund its business activities and plans on an ongoing basis
- operating and technical difficulties in connection with mineral exploration or development or mine development activities for the Company's projects generally, including the geological mapping, prospecting, drilling and sampling programs for the Company's projects
- actual results of exploration activities, including exploration results, the estimation or realization of mineral reserves and mineral resources, the timing and amount of estimated future production, costs of production, capital expenditures, and the costs and timing of the development of new deposits,
- possible variations in ore grade or recovery rates, possible failures of plants, equipment or processes to operate as anticipated, accidents, labour disputes and other risks of the mining industry
- delays in obtaining governmental and regulatory approvals (including of the TSX Venture Exchange), permits or financing or in the completion of development or construction activities
- changes in laws, regulations and policies affecting mining operations, hedging practices, currency fluctuations, title disputes or claims limitations on insurance coverage and the timing and possible outcome of pending litigation, environmental issues and liabilities, risks related to joint venture operations, and risks related to the integration of acquisitions
- requirements for additional capital, future prices of precious metals, changes in general economic conditions, changes in the financial markets and in the demand and market price for commodities
- those factors discussed under the headings "Risk and Uncertainties" and "Financial Instruments and Risk Management" in this MDA and other filings of the Company with the Canadian Securities Authorities, copies of which can be found under the Company's profile on the SEDAR website at [www.sedar.com](http://www.sedar.com).

Readers are cautioned not to place undue reliance on forward-looking statements. The Company undertakes no obligation to update any of the forward-looking information in this presentation or incorporated by reference herein, except as otherwise required by law.

## **EXPLORATION PROJECTS**

### **Tintyava Gold Property and Rozino Gold Project – Bulgaria**

Velocity (through a Bulgarian subsidiary) holds an option to acquire an undivided 70% legal and beneficial interest in the Tintyava property (163km<sup>2</sup>), free and clear of all liens and encumbrances, granted by Gorubso Kardzhali A.D. (“Gorubso”). The Rozino gold project is located within the Tintyava property. To exercise the option for the Tintyava property, the Company must pay the \$325,000 tender fee (paid) to the Ministry of Energy of the Republic of Bulgaria and deliver an NI 43-101 preliminary economic assessment (“PEA”). The option is exercisable for a period of up to six years.

The Rozino project is located 20km east of the 0.85 Moz Ada Tepe gold deposit, currently being developed by Dundee Precious Metals Inc., and 50km southeast of the city of Kardzhali, which is host to tailings and gold processing facilities operated by Gorubso.

Cautionary Note. Ada Tepe measured and indicated resource (2013); Upper Zone 5.0Mt @ 2.99g/t gold (0.482Moz, 0.6g/t COG) and Wall Zone 1.9Mt @ 6.13g/t gold (0.377Moz, 0.8g/t COG). Readers are cautioned that Ada Tepe is an adjacent property and that Velocity has no interest in or right to acquire any interest in the deposit, and that mineral deposits on adjacent or similar properties, and any production therefore or economics with respect thereto, are not in any way indicative of mineral deposits on Velocity’s properties or the potential production from, or cost or economics of, any future mining of any of Velocity’s mineral properties.

The Rozino project was first explored in the 1980’s by the Bulgarian state company Asenovgrad Geoenvironmental EAD, which completed 86 vertical diamond drill holes for 14,289m. Available drill technology was limited to vertical drill holes, which in the context of steeply-dipping zones of mineralization was not a suitable approach. Hereward Ventures Ltd (“Hereward”) and Asia Gold Corp. (“Asia Gold”) began exploration in 2001 and completed three phases of drilling between 2004 and 2006, completing 55 diamond drill holes for 7,995m. Diamond drilling was angled but oriented to the northwest, parallel to the predominant outcropping structural trends and therefore less than optimal.

In 2005-2006 Asia Gold carried out a structural review and recognized a strong northwest control on mineralisation and completed two drill holes to test this new idea. Drill hole R-245 was drilled towards the northeast, perpendicular to the newly-interpreted northwest control on mineralization, and intersected 68m @ 3.15 g/t gold, including 11.39m @ 8.09 g/t gold. The current exploration model at Rozino has not had sufficient drill testing to be able to determine true thickness of mineralization.

In summary, prior to Velocity’s involvement, over 20km of diamond drilling was completed but due to sub-optimal drill orientations, the deposit was still not well defined. Asia Gold’s drill hole R-245 confirmed that mineralisation exists between the drill fences and Velocity’s exploration thesis is that the potential for wide intersects at locally high grades is high.

Exploration upside at Rozino is good. The area surrounding the drilled Rozino mineralization (“Main Zone”) has historically been soil sampled and trenched with both methods providing coherent anomalies for follow-up. Historical trench results are compelling and although only two historical drill holes (from a total of 142) tested the trench anomalies, the results were positive. Due to the limited amount of available data and variable orientation of trenches following irregular forest tracks and clearings, true thicknesses are at present difficult to ascertain.

The Rozino project is a typical Low Sulphidation Epithermal gold deposit hosted within Palaeogene sediments as disseminations, replacement and vein mineralization. The mineralogy of the Rozino deposit is simple, consisting mainly of pyrite.

Several historical metallurgical tests were completed at Rozino. The most recent was reported by Wardell Armstrong on a single series of agitated cyanide extraction tests and the results returned average recoveries from three samples based on cyanide in pulp and cyanide in leach extraction of 94.7% and 97.7%, respectively.

^ The current exploration model has not had sufficient drill testing to be able to determine true thickness of mineralization. \* A top-cut of 40g/t was applied to intersections in RDD-002 and RDD-009.

Velocity filed a technical report on SEDAR in late July 2017. The technical report includes recommendations for the first year of exploration including the purchase of satellite imagery and high resolution topographic data, reprocessing of historical airborne and ground geophysics, survey of historic drill collars, additional systematic trenching including over

untested soil anomalies, heel-to-toe drilling oriented to the northeast (perpendicular to the northwest control on mineralization), additional metallurgical testing in preparation for further resource drilling and PEA, as well as implementation of appropriate QA/QC procedures and set-up of standard operating procedures.

Exploration drilling at Rozino was initiated in July 2017. A total of 16 drill holes have been completed to date (approximately 3,500m) with results for 11 drill holes having been received and announced (table above). The Company maintains a web site where an up to date drill plan and cross sections can be reviewed ([www.velocityminerals.com](http://www.velocityminerals.com)) together with news releases.

Drill holes to date have been targeted to test the new exploration thesis that mineralization is controlled by northwest-trending structures and all drill holes have been drilled perpendicular to this trend. All drilling at Main Zone has returned positive results in all holes. Exploration has been completed on targets approximately 300m north, 300m east and 100m south of Main Zone and all drill tests have returned positive results in all holes.

The Company plans to continue drilling at Rozino and expects to have a second drill rig on site before the end of October 2017. The Company expected to complete approximately 7,000m of drilling before year end. A cumulative 12,000m is planned to be completed by the end of Q2 2018.

### **Ekuzya Gold Property – Bulgaria**

Velocity (through a Bulgarian subsidiary) holds an option to acquire an undivided 50% legal and beneficial interest in the Ekuzya property, free and clear of all liens and encumbrances, in consideration for incurring US\$1 million in exploration expenditures over a two year period, as to US\$500,000 in the first year and US\$500,000 in the second year; provided that if after Velocity has incurred the expenditures and there is a delay of more than 180 days in effecting the transfer of the earned interest in the property to Velocity or if at any time prior thereto Velocity elects not to exercise the option, then Velocity's interest in the property will be limited to the obligation of Gorubso to pay Velocity a 5% gross value commission on all metals discovered on the property as a result of Velocity's exploration activities thereon.

The Ekuzya property has an area of 2.13 km<sup>2</sup> and is located within the Chala Mining Concession held by Gorubso, and located in southeast Bulgaria, about 230km by road, east-southeast of the capital Sofia. The Ekuzya property is situated south and adjacent to the currently operating Chala gold mine, operated by Gorubso. Gorubso's processing plant including a cyanide tank leach plant and tailings management facility is located at the town of Kardzhali, 35km by road from the Chala mine. The mining concession is valid until 2031.

Ekuzya can be accessed year-round by four-wheel drive vehicle via a collection of existing forestry and historical drill roads. The Chala mine office is located in the small village of Gorno Bryastovo where mine staff totalling 210 employees operates three shifts per day, year-round operation. The Chala mine site contains basic ore handling infrastructure, an underground explosives magazine and various workshops for routine maintenance and repair. Run of mine ore is transported by trucks to Kardzhali for processing at Gorubso's processing plant prior to crushing, milling, gravity concentration and on-site cyanide in leach (CIL) extraction, elution and production of gravity concentrate and dore.

Velocity has compiled all of the exploration data available within the Ekuzya property and has digitally captured the most significant information into a project database stored within a Micromine exploration and mining software system. Historical exploration within the Ekuzya property includes 79 base metal diamond core drill holes for 64,350m with no gold analysis and 17 gold diamond core drill holes for 15,095m.

The mineralization at the Ekuzya property is an Intermediate Sulphidation Epithermal vein type gold – base metal deposit. Previous Soviet-style exploration appears to have been vigorous, systematic and based on a solid understanding of economic geology. The digital capture of these large data sets (more than 200 large format maps scanned and digitised) has enabled Velocity to produce a reasonable model of mineralization within the Ekuzya property with the result that the structural control on mineralisation has become apparent.

Velocity initially identified three target areas named Zone 5, Zone 5a and Ekuzyata, where previous operators have reported significant gold results. The highest priority target is the potentially open pittable, stratabound epithermal vein and dissemination target at Ekuzyata. Previous trenching has identified a shallow dipping zone over a strike length of 500m and a down dip extent of at least 250m. Previous trenching returned multiple significant intercepts across the strike extent with 3.5m @ 6.0g/t in the west, 10.8m @ 2.2g/t in the centre of the target and 3.1m @ 3.6g/t in the east. True thicknesses at Ekuzyata are at present difficult to ascertain with the current level of available data.

Velocity has filed on SEDAR a technical report prepared under National Instrument 43-101 on the Ekuzya property. The technical report includes exploration recommendations for the first year of exploration include acquisition of satellite imagery and topographic data, DGPS survey of historic exploration collars and trenches, soil sampling over the Ekuzyata target, systematic trenching of soil geochemistry anomalies, twinning of one drill hole, up to eight drill holes at target Zone 5, and if appropriate, drill testing of Ekuzyata soil and trench anomalies. The recommended budget for the first year of exploration of US\$510,000 includes 1,000m of diamond core drilling after the completion of soil sampling and trenching.

Since closing the Transaction, Velocity has completed soil sampling on a 50m by 50m grid in the eastern portion of the property (400 soil samples). Results have established eight targets that are prospective for gold mineralization. These include Ekuzyata, Zone 5 and Zone 5a, which were established as targets using historical drilling and historical base metal mining records where available. Five additional and previously unknown anomalies have also been detected. The eight targets together comprise over 30 hectares. Trench sampling at the Ekuzyata target, extending into soil anomaly Zone 5 has been completed and results are pending. On receipt of trench results, the Company will continue trenching the untested soil anomalies with a view to drilling targets in early 2018.

#### **Mt. Haskin Molybdenum Property – British Columbia, Canada**

The Company's wholly-owned subsidiary, Velocity Exploration Ltd., holds a 100% interest in the Mt. Haskin property, a molybdenite prospect located in the Cassiar District of the Liard Mining Division in northwestern British Columbia, Canada. The claims are subject to a 3% NSR, which may be acquired by the Company for a cash payment of \$1,500,000. At June 30, 2013, the Company determined that the Mt. Haskin property was impaired and wrote off all associated costs to operations. Since that time, no significant exploration has been carried out on the property. During the year ended June 30, 2016, the Company completed the reclamation work required by the Government of B.C. and filed a report supporting this work. The work and report were approved by the BC Government which resulted in the refund in full of the \$25,000 bond that had been posted with the Government of B.C.

The Company considers its Canadian asset to be a non-core asset and is actively seeking a joint venture partner to move the property forward.

#### **Quality Assurance and Quality Control**

The work programs at Rozino and Ekuzya are designed and supervised by Stuart A. Mills, CGeol, the Company's Vice-President Exploration, who is responsible for all aspects of the work, including the quality control/quality assurance program.

At Rozino, on-site personnel at the project rigorously collect and track samples which are then security sealed and shipped to ALS Global laboratory in Romania. Samples used for the results described herein are prepared and analyzed by fire assay using a 30-gram charge in compliance with industry standards. Field duplicate samples, blanks and independent controlled reference material (standards) are added to every batch. Drill intersections in this news release are calculated using a 0.2 g/t gold trigger, a minimum 0.5 g/t gold composite, and a maximum of 3 meters consecutive waste.

At Ekuzya, on-site personnel at the project rigorously collect and track samples which are then security sealed and shipped to Eurotest Control EAD in Sofia. Soil samples were collected as bulk samples and sieved in the Eurotest laboratory to 80% passing 200µ. The samples were analyzed by fire assay using a 30-gram charge in compliance with industry standards. Field duplicate samples and blanks are added to every batch.

#### **Qualified Person**

Stuart Mills, the Vice President Exploration for the Company, and a Qualified Person as defined by National Instrument 43-101, has approved the scientific and technical information concerning the Company discussed in this MDA. Mr. Mills is not independent of the Company as he is an officer, a shareholder and holds incentive stock options.

#### **SELECTED ANNUAL INFORMATION**

The following selected financial data have been prepared in accordance with IFRS unless otherwise noted and should be read in conjunction with the Company's consolidated financial statements. The following table sets forth selected financial data for the Company for and as of the end of the last three completed financial years.

<b>Financial Year Ended</b>	<b>June 30, 2017</b>	<b>June 30, 2016</b>	<b>June 30, 2015</b>
Net comprehensive loss	\$ 124,250	\$ 23,666	\$ 538,528
Earnings (loss) per share – basic and diluted	\$ (0.01)	\$ (0.01)	\$ (0.74)
Total assets	\$ 1,630,085	\$ 3,244	\$ 32,164
Working capital (deficiency)	\$ 1,532,928	(\$799,581)	(\$ 870,915)

During the year ended June 30, 2017, the Company completed a non-brokered private placement of 14,000,000 units at a price of \$0.06 per unit for gross proceeds of \$840,000 less share issue costs of \$3,241 and had 14,000,000 warrants exercised for gross proceeds of \$1,050,000.

During year ended June 30, 2016, the Company settled \$110,348 of outstanding payables with various vendors for the sum of \$41,000 cash resulting in a gain of \$69,348 and amounts due to related parties was assigned to arm's length parties to facilitate the reactivation of the Company. The Company also closed a non-brokered private placement of 1,200,000 shares at a price of \$0.005 per share to qualified investors, for gross proceeds of \$60,000.

During year ended June 30, 2015, the Company determined that the Orogrande project was impaired and wrote-off all associated costs in the amount of \$441,596 to operations.

### **Overview - 2017**

#### ***Results of Operations for the years ended June 30, 2017***

This review of the Results of Operations should be read in conjunction with the consolidated financial statements of the Company for the year ended June 30, 2017.

During the year ended June 30, 2017, the Company incurred a net loss of \$124,250 (2016 – \$92,949).

The following discussion explains the variations in key components of these numbers but, as with most junior mineral exploration companies, the results of operations are not the main factor in establishing the financial health of the Company. Of far greater significance are the mineral properties in which the Company has, or may earn, an interest, its working capital and how many shares it has outstanding. Quarterly results can vary significantly depending on whether the Company has abandoned any properties or granted any stock options.

The Company's general and administrative costs were \$124,250 (2016 - \$92,949), and reviews of the major items are as follows:

- Professional fees of \$26,522 (2016 - \$43,916), in the current year consists of legal fees for the reactivation of the Company and in the prior year \$18,301 in consulting fees related to the completion of the reclamation work on the Mt Haskin property which enabled the Company to recover the \$25,000 bond that had been posted with the BC Government;
- Office rent and administration of \$35,545 (2016 - \$27,814) was paid or accrued for the Company's corporate office, expenses and corporate administration and;
- Regulatory and transfer agent of \$17,364 (2016 - \$20,808) included fees paid for financing completed during the year and in the previous year expenses related to 10 – 1 share consolidation.

Other income \$Nil (2016 - \$69,283) due to their nature, these transactions relate to events that do not necessarily generate comparable effects on the Company's operating results. Significant areas of change include:

- Gain on settlement of accounts payable of \$Nil (2016 - \$69,348)

### **Overview - 2016**

#### ***Results of Operations for the years ended June 30, 2016***

This review of the Results of Operations should be read in conjunction with the consolidated financial statements of the Company for the year ended June 30, 2016.

During the year ended June 30, 2016, the Company incurred a net loss of \$23,666 (2015 - \$538,528). Some of the expenses are as follows:

- Management fees of \$Nil (2015 - \$27,119) were paid or accrued to directors and to companies controlled by directors of the Company for management services provided. See “Related Party Transactions”. The significant decrease compared to the previous period is due primarily to the suspension of management salaries as a result of decreased corporate activity.
- Filing and transfer agent fees of \$20,808 (2015 - \$12,389) were paid to maintain the Company’s listed status on the TSXV/NEX. The increase was due to fees related to the 10 to 1 share consolidation completed in November 2015.
- Office rent and administration of \$27,814 (2015 - \$25,898) was paid or accrued for the Company’s corporate office, expenses and corporate administration.
- Professional fees of \$43,916 (2015 - \$28,050) were paid or accrued for legal, audit and consulting fees. The current year included \$18,301 in consulting fees related to the completion of the reclamation work on the Mt Haskin property which enabled the Company to recover the \$25,000 bond that had been posted with the BC Government.

Other income \$69,283 (2015 - \$441,096) Due to their nature, these transactions relate to events that do not necessarily generate comparable effects on the Company’s operating results. Significant areas of change include:

- Write-off of exploration and evaluation assets was \$Nil (2015 - \$441,596) and;
- Gain on settlement of accounts payable of \$69,348 (2015 - \$Nil).

### **SUMMARY OF QUARTERLY RESULTS**

The following selected financial data have been prepared in accordance with IFRS and should be read in conjunction with the Company’s consolidated financial statements. The following is a summary of selected financial data for the Company for its eight completed financial quarters ended June 30, 2017.

<b>Quarter Ended Amounts in 000’s</b>	<b>June 30, 2017</b>	<b>Mar. 31, 2017</b>	<b>Dec. 31, 2016</b>	<b>Sept. 30, 2016</b>	<b>Jun. 30, 2016</b>	<b>Mar. 31, 2016</b>	<b>Dec. 31, 2015</b>	<b>Sep. 30, 2015</b>
Net income (loss)	(82)	(16)	(13)	(13)	(23)	(12)	(26)	38
Earnings (loss) per share – basic and diluted	(0.01)	(0.00)	(0.00)	(0.00)	(0.01)	(0.01)	(0.01)	(0.05)
Total assets	1,630	255	13	26	3	17	20	41
Working capital	1,533	235	1	14	(800)	(786)	(774)	(772)

During the quarter ended June 30, 2017 the company had 14,000,000 warrants exercised for proceeds of \$1,050,000.

During the quarter ended March 31, 2017 the Company received \$250,000 in share subscriptions received in advance.

During the quarter ended September 30, 2016 the Company consolidated its share capital on a 10 to 1 basis. All share and per share amounts have been retroactively restated to reflect the consolidation. The Company also raised gross proceeds of \$840,000 through the issuance of 14,000,000 units (“Unit”) at a price of \$0.06 per Unit. Each Unit consisted of one common share and one common share purchase warrant entitling the holder to purchase one additional common share at an exercise price of \$0.075 per share until July 27, 2017.

During the quarter ended September 30, 2015 the Company settled \$110,348 of outstanding payables with various vendors for the sum of \$41,000 cash resulting in a gain of \$69,348 and closed a non-brokered private placement of 1,200,000 shares at a price of \$0.05 per share to qualified investors, for gross proceeds of \$60,000

**Three Months ended June 30, 2017 compared to three months ended June 30, 2016**

The Company’s general and administrative costs were \$82,010 (2016 - \$23,100), and reviews of the major items are as follows:

- Office rent and administration of \$11,418 (2016 - \$7,785) was paid or accrued for the Company’s corporate office, expenses and corporate administration and;
- Professional fees of \$23,977 (2016 - \$13,500), were because of the Company’s general corporate matters, private placement activities, audit accrual and accounting;

**LIQUIDITY AND CAPITAL RESOURCES**

The financial statements have been prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The continuing operations of the Company are dependent upon its ability to continue to raise adequate financing and to commence profitable operations in the future. The Company draws attention to matters and conditions that indicate the existence of a material uncertainty that may cast significant doubt about the Company’s ability to continue as a going concern.

\$	June 30, 2017	June 30, 2016
Working capital surplus (deficiency)	1,532,928	(799,581)
Deficit	(7,687,138)	(7,562,888)

Net cash used in operating activities during the year ended June 30, 2017 was \$996,656 (June 30, 2016 – \$94,860). The increase in cash used was mainly due to the settlement of accounts payable and amounts due to related parties.

Net cash provided by investing activities during the year ended June 30, 2017 was \$Nil (2016 - \$26,935). The previous year was comprised of \$1,935 received upon the sale of marketable securities and \$25,000 received upon the refund of a reclamation bond.

Net cash provided by financing activities during the year ended June 30, 2017 was \$2,456,759 (June 30, 2016 - \$70,000). The Company completed a non-brokered private placement of 14,000,000 units at a price of \$0.06 per unit for gross proceeds of \$840,000 less share issue costs of \$3,241 and had 14,000,000 warrants exercised for gross proceeds of \$1,050,000. The Company also received \$570,000 (June 30, 2016 - \$10,000) in share subscriptions receive in advance. During the year ended June 30, 2016 the Company completed a non-brokered private placement of 1,200,000 shares at a price of \$0.05 per common share for gross proceeds of \$60,000.

There can be no assurance that the Company will be able to obtain adequate financing in the future or that the terms of such financing will be favorable. If adequate financing is not available when required, the Company may be required to delay, scale back or eliminate various programs and may be unable to continue in operation. The Company may seek such additional financing through debt or equity offerings, but there can be no assurance that such financing will be available on terms acceptable to the Company or at all. Any equity offering could result in dilution to the ownership interests of the Company’s shareholders and may result in dilution to the value of such interests.

The Company’s future revenues, if any, are expected to be in large part derived from the development of its mineral properties for the mining of certain minerals, particularly gold, or interests related thereto. The economics of developing and producing resource properties are affected by many factors including the cost of operations, variations in the grade of ore discovered or mined and the price of the metals produced. Depending on metal prices, the Company may determine that it is impractical to continue development of its mineral properties or to pursue commercial production. In the case of

molybdenum, its price has fallen in recent years. gold prices are affected by factors that include anticipated changes in international investment patterns and monetary systems, economic growth rates, political developments and shifts in supply and demand. In the case of gold, prices remain moderate to strong for the foreseeable future.

### **RELATED PARTY TRANSACTIONS**

The Company entered into the following transactions with related parties:

#### **Key management personnel compensation**

The Company entered into the following transactions with key management personnel, being those persons having authority and responsibility for planning, directing and controlling the activities of the Company, including directors and management.

\$	Year Ended	
	June 30, 2017	June 30, 2016
Rent charged by a company controlled by an officer of the Company	-	4,000
Administration fees charged by a company controlled by an Officer of the Company	33,750	22,500
	33,750	26,500

The amounts recorded as due to related parties of \$Nil (June 30, 2016 - \$23,843) are payable to directors and officers and to companies controlled by directors of the Company. These amounts are unsecured, non-interest bearing and have no fixed terms of repayment.

During the year ended June 30, 2017, the Company paid rent of \$Nil (2016 - \$4,000) to a company controlled by an officer of the Company.

During the year ended June 30, 2017, the Company paid or accrued administration fees of \$33,750 (2016 - \$22,500) to a company controlled by the President and CEO of the Company.

These transactions were in the normal course of operations and were measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

### **OUTSTANDING SHARE DATA**

(a) As of the date of the MDA the Company has 61,188,413 issued to date and outstanding common shares. The authorized share capital is unlimited no par value common shares.

(b) As at the date of the MDA the Company has 4,200,000 incentive stock options outstanding.

(c) As at the date of the MDA the Company has 6,926,278 share purchase warrants.

### **CRITICAL ACCOUNTING POLICIES AND ESTIMATES**

The preparation of the Company's consolidated financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the consolidated financial statements and reported amounts of revenues and expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ from these estimates.

Areas requiring a significant degree of estimation and judgment relate to the recoverability of the carrying value of exploration and evaluation assets, fair value measurements for financial instruments and share-based compensation and other equity-based payments, the recognition and valuation of provisions for restoration and environmental liabilities, and the recoverability and measurement of deferred tax assets and liabilities. Actual results may differ from those estimates and judgments.

#### **OFF-BALANCE SHEET ARRANGEMENTS**

The Company has not entered into any off-balance sheet financing arrangements.

#### **PROPOSED TRANSACTIONS**

Currently the Company is not a party to any material proceedings. The Company continually evaluates new opportunities, including new properties by staking, acquisition or joint venture, and corporate consolidation or merger opportunities.

#### **NEW STANDARDS AND UPCOMING ACCOUNTING PRONOUNCEMENTS**

Please refer to note 2 of the June 30, 2017 consolidated financial statements on [www.sedar.com](http://www.sedar.com) for a comprehensive list of the accounting policies not yet adopted during the current year.

#### **RISKS AND UNCERTAINTIES**

The Company's business is mineral exploration. Companies in this industry are subject to many and varied kinds of risks, including but not limited to, environmental, mineral prices, political, and economical.

The Company will take steps to verify the title to any properties in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties. These procedures do not guarantee the Company's title. Property titles may be subject to unregistered prior agreements or transfers and title may be affected by undetected defects.

The Company has no significant sources of operating cash flow and no revenue from operations. Additional capital will be required to fund the Company's exploration program. The sources of funds available to the Company are the sale of equity capital or the offering of an interest in its project to another party. There is no assurance that it will be able to obtain adequate financing in the future or that such financing will be advantageous to the Company.

The property interests to be owned by the Company or in which it may acquire an option to earn an interest are in the exploration stages only, are without known bodies of commercial minerals and have no ongoing operations. Mineral exploration involves a high degree of risk and few properties, which are explored, are ultimately developed into production. If the Company's efforts do not result in any discovery of commercial minerals, the Company will be forced to look for other exploration projects or cease operations.

The Company is subject to the laws and regulations relating to environmental matters in all jurisdictions in which it operates, including provisions relating to property reclamation, discharge of hazardous materials and other matters. The Company may also be held liable should environmental problems be discovered that were caused by former owners and operators of its properties in which it previously had no interest. The Company is not aware of any existing environmental problems related to any of its current or former properties that may result in material liabilities to the Company.

#### **FINANCIAL INSTRUMENTS AND RISK MANAGEMENT**

##### **Financial Risk Factors**

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 – Inputs that are not based on observable market data

The fair value of cash is measured at Level 1 of the fair value hierarchy. The carrying value of receivables, and accounts payable and accrued liabilities approximate their fair value because of the short-term nature of these instruments.

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

#### ***Credit Risk***

Credit risk is the risk of loss associated with a counter party's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash and receivables. Management believes that the credit risk concentration with respect to receivables is remote as they are due from the Government of Canada. The Company's cash is deposited in accounts held at a large financial institution in Canada. As such, the Company believes the credit risk with cash is remote. Receivables comprise input tax receivables due from the Government of Canada. The Company considers the credit risk of receivables to be low.

#### ***Liquidity Risk***

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As of June 30, 2017, the Company had a cash balance of \$1,462,508 (2016 - \$2,405) to settle current liabilities of \$97,157 (2016 - \$802,825). All the Company's financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms.

The Company intends to raise additional equity financing in the coming fiscal year to meet its obligations.

#### ***Interest Rate Risk***

The Company has cash balances and no interest-bearing debt. The Company's current policy is to invest excess cash in investment-grade demand investments issued by its banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks. The Company is not subject to significant exposure to interest rate risk.

#### ***Foreign Currency Risk***

The Company is exposed to foreign currency risk on fluctuations related to assets and liabilities that are denominated in USD. The Company has minimal balances in USD, and is there for minimally exposed to foreign currency risk.

#### ***Price Risk***

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's profit or loss, the ability to obtain financing, or the ability to obtain a public listing due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on profit or loss and economic value due to commodity price movements and volatilities. The Company closely monitors commodity prices, individual equity movements and the stock market to determine the appropriate course of action to be taken by the Company. Fluctuations in value may be significant.

## **CAPITAL MANAGEMENT**

The Company defines capital that it manages as shareholders' equity, consisting of issued common shares, stock options and warrants included in reserve, and subscriptions receivable.

The Company manages its capital structure and adjusts it, based on the funds available to the Company, in order to support the acquisition, exploration and development of exploration and evaluation assets. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

The property in which the Company currently has an interest is in the exploration stage; as such the Company has historically relied on the equity markets to fund its activities. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient economic potential and if it has adequate financial resources to do so.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. The Company is not subject to externally imposed capital restrictions. There were no changes to the Company's approach to capital management during the year.

## **MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING**

Disclosure controls and procedures are controls and other procedures that are designed to provide reasonable assurance that all relevant information required to be disclosed in the Company's reports filed or submitted as part of the Company's continuous disclosure requirements is gathered and reported to senior management, including the Company's Chief Executive Officer and Chief Financial Officer, on a timely basis so that appropriate decisions can be made regarding public disclosure and such information can be recorded, processed, summarized and reported within the time periods specified by applicable regulatory authorities.

Management of the Company, with the participation of the Chief Executive Officer and the Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures as at June 30, 2017 as required by Canadian securities laws. Based on that evaluation, the Chief Executive Officer and the Chief Financial Officer have concluded that, as of June 30, 2017, the disclosure controls and procedures were effective. However, Management and the Board of Directors recognize that no matter how well designed the Company's control systems are, such controls can only provide reasonable assurance, not absolute assurance, of detecting, preventing and deterring errors.

## **CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING**

There have not been any changes in the Company's internal control over financial reporting or any other factors during the year ended June 30, 2017, that have materially affected, or are reasonably likely to materially affect our internal control over financial reporting.

## **DISCLOSURE OF MANAGEMENT COMPENSATION**

In accordance with the requirements of Section 19.5 of TSXV Policy 3.1, the Company provides the following disclosure with respect to the compensation of its directors and officers during the period:

1. During the year ended June 30, 2017, the Company did not enter into any standard compensation arrangements made directly or indirectly with any directors or officers of the Company, for their services as directors or officers, or in any other capacity, with the Company or any of its subsidiaries except as disclosed under "Related Parties Transactions".
2. During the year ended June 30, 2017, officers of the Company were paid for their services as officers by the Company as noted above under "Related Parties Transactions".

3. During the year months ended June 30, 2017, the Company did not enter into any arrangement relating to severance payments to be paid to directors and officers of the Company and its subsidiaries.

**APPROVAL**

The Board of Directors of the Company has approved the disclosures in this MDA.

Additional information related to the Company is available on SEDAR at [www.sedar.com](http://www.sedar.com).
